# Lab 6: Local Relief Map of the Wolong National Nature Reserve

Calvin Bailey
3/3/2025

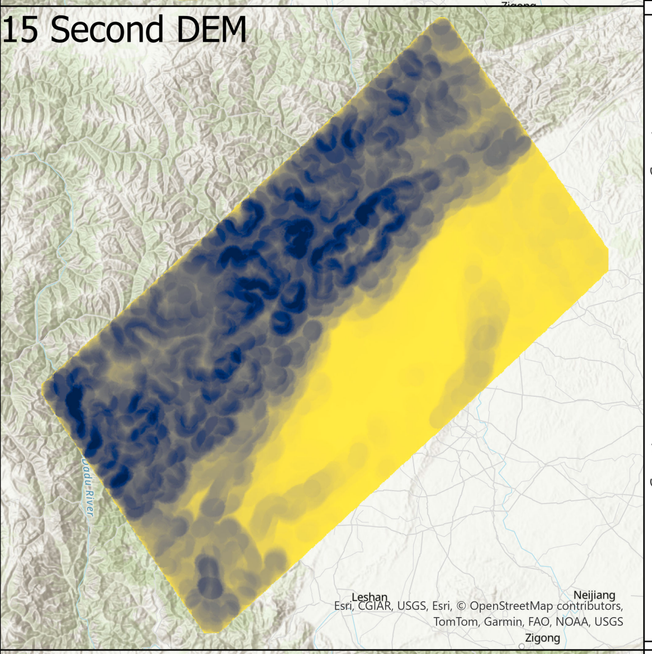

This Map illustrates the local relief, which is the difference in elevation between the highest and lowest points in a specific area. The 3, 15, and 30 second DEM are shown to exemplify how the different grid sizes affect analysis. 3 second provides a much more detailed view of the area but takes much more computing power. Allowing for highly specific analysis that has high time cost. Whereas 15 and 30 second provide a lower resolution view and more generalized analysis but much faster computing speeds.

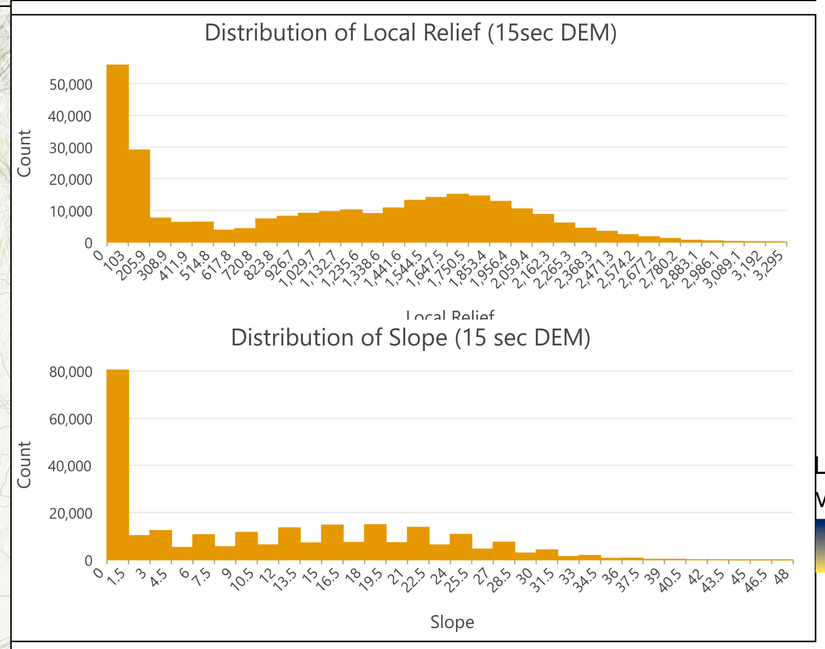

3 second DEM

15 Second DEM

30 Second DEM
